Value of \$10,000 investment[‡] – Series A

What does the Fund invest in?

The Fund seeks to provide some interest income while protecting capital and providing liquidity by investing primarily in high quality debt securities.

It will ensure that it meets at all times the definition of a "money market fund" as prescribed by securities legislation.

Key Reasons to Invest

- A short-term investment that looks to provide moderate cash flow with a focus on preservation of capital.
- The Fund invests primarily in money market instruments that mature in less than 365 days and will strive to maintain a constant \$10 unit value.
- Low risk investment.

[‡] Around February 8, 2005, the portfolio manager changed. This change may have affected the Fund's performance.

¹ Excludes Cash and Other Net Assets. ² Excludes Cash and Other Net Assets and applicable investment funds not managed by IA Clarington Investments Inc.

[†]Distributions (\$/share) and Distributions (\$/unit) are paid using a calculation rounded up to 5 decimal places. Please note the distributions presented above are rounded to the nearest 3 decimal places.

Commissions, trailing commissions, management fees, brokerage fees and expenses all may be associated with mutual fund investments, including investments in exchange-traded series of mutual funds. Please read the prospectus before investing. The performance data provided assumes reinvestment of distributions only and does not take into account sales, redemption, distributions or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual fund securities are not covered by the Canada Deposit Insurance Corporation or by any other government deposit insurer. There can be no assurances that the Fund will be able to maintain its net asset value per security at a constant amount or that the full amount of your investment in the Fund will be returned to you. Past performance may not be repeated. The performance data of different series may differ for a number of reasons, including but not limited to the different fee structures. The payment of distributions and distribution breakdown, if applicable, is not guaranteed and may fluctuate. Where a material merger has occurred, performance is measured from the date of the merger (Performance Start Date or PSD). The payment of distributions should not be confused with a Fund's performance, rate of return, or yield. If distributions paid by the Fund are greater than the performance of the Fund, then your original investment will shrink. Distributions paid as a result of capital gains realized by a Fund and income and dividends earned by a Fund are taxable in your hands in the year they are paid. Your adjusted cost base will be reduced by the amount of any returns of capital. If your adjusted cost base goes below zero, then you will have to pay capital gains tax on the amount below zero. A mutual fund's "yield" refers to income generated by securities held in the fund's portfolio and does not represent the return or level of income paid out by the fund. The "Portfolio Yield" characteristic listed in the fund profile refers to the yield of the Fund as a whole, not that of each series of the Fund. Please refer to the prospectus for details and descriptions of the different series offered by the Fund. Securities denominated in U.S. dollars may not be held in Registered Plans, other than in a TFSA.
